

Brightree Ranked Among the Top 100 Healthcare Information Technology Companies of 2018

Brightree listed for the fifth consecutive year

ATLANTA – June 7, 2018 – Brightree, the leading provider of cloud-based software to improve clinical and business performance of post-acute care companies, announced today that it has been ranked number #71 in Healthcare Informatics Magazine’s 2018 annual listing of the Top 100 healthcare information technology companies.

Brightree’s 2018 ranking marks the fifth consecutive year the company has appeared on the list. The Healthcare Informatics 100 is a compilation of the top healthcare information technology companies operating in the United States, based on healthcare IT (HIT) revenues from the most recent fiscal year.

“Today’s listing highlights Brightree’s growing revenue and strong leadership position in the health IT industry, both of which deliver significant long-term value to ResMed’s expanding software-as-a-service (SaaS) portfolio,” said Raj Sodhi, SaaS president at ResMed, Brightree’s parent company.

“Achieving this recognition five years running is the result of the talent, dedication and passion of our employees in creating innovative solutions for the post-acute healthcare market,” said Matt Mellott, President and CEO of Brightree.

“More than just a list, the Healthcare Informatics 100 is an absolute indicator of which companies are solving issues in the U.S. healthcare industry – and doing it at scale,” said Rich Tomko, vice president and managing director of Healthcare Informatics.
